The history of AI

1940s-1950s

Foundations of AI

In the 1940s, the first artificial neurons were conceptualised. The 1950s introduced us to the Turing Test and the term “Artificial Intelligence.

1960s-1970s

Early Development

The 60s and 70s brought the birth of ELIZA, simulating human conversation, and Dendral, the first expert system, showcasing the early potentials of AI.

explain what made you unhappy ?
```

2010s marked major AI milestones, including pioneering work in image recognition and the birth of GANs in 2014, followed by OpenAI's founding in 2015.

2020s

GenAI Reaches New Horizons

At the start of this decade, we've seen significant strides in GenAI, notably with OpenAI’s GPT-3 and DALL-E. 2023 welcomed advanced tools like ChatGPT-4 and Google’s Bard, alongside Microsoft’s Bing AI, enhancing accessibility and reliability of information.

Teknologien bak ChatGPT, var ferdig utviklet nesten et år før lansering, så dette var ikke ny teknologi.
Det vi gjorde annerledes var at vi gjorde litt ekstra arbeid for å sørge for at den traff mennesker bedre.

3d • Edited •

Vi tillsätter en företagsövergripande AI-ansvarig på Sveriges Radio.

Den 1 oktober tillträder Olle Zachrison och tar plats i ledningsgruppen för Programenheten, Programledningen. Rollen är ny och innefattar ansvaret för hur Sveriges Radio arbetar med AI framåt. Det innebär både att använda potentialen med AI, men även minimera publicistiska risker.

Olle har, i sin nuvarande roll, redan haft uppdraget att följa AI-utvecklingen och var 2020 med och grundade branschnätverket Nordic AI Journalism där såväl kommersiella medier som public service deltar. Han är också djupt involverad i flera AI-relaterade EBU-projekt i samarbete med andra europeiska public service-bolag.

After having been central to a project across Schibsted's news division examining the impact #AI will have on future newsrooms, Eivind Hjertholm Fiskerud, long term development editor in Bergens Tidende will now take on an AI role at Schibsted News Media. 🌟 Here he will contribute to advancing the work on AI in our Norwegian and Swedish media houses.

"Eivind has shown incredible dedication to exploring how AI can enhance the work of journalism – not just at Bergens Tidende but in all of our media houses. Additionally, he has a healthy critical approach to the challenges this technology will pose for the profession and the industry. I am thrilled that Eivind has embraced this new challenge," says Fredric Karén, responsible for editorial transformation and collaboration at Schibsted News Media

Lasse Funder Andersen • 2nd
Leder af AI-løsninger, DR Nyheder
1w •

JOBNYT
Nu er det officielt - jeg har fået det mest spændende job i dansk journalistik! Jeg flytter ikke hjemmefra, men skifter funktion, så jeg fra nu af er leder af AI-løsninger i DR Nyheder.

Jeg har de seneste fem år (Ja, også før ChatGPT var en ting 🤓) beskæftiget mig intensivt med kunstig intelligens. Jeg har nørdet det i en grad, så der i 2021 kom en kandidatgrad fra IT-universitetet ud af det, og i foråret supplerede jeg med et enkeltfag i Advanced Machine Learning. Så jeg føler mig i den grad klædt på, og det et er en kæmpe tilfredsstillelse at få lov til at bringe mine nye kompetencer i spil - sådan for alvor. Jeg glæder mig enormt meget til at gå fra små sideprojekter til at bruge al min arbejdstid på AI x journalistik.

For der er et kæmpe potentiale i AI inden for vores fag. Mange af vores "gammeldags" arbejdsgange og processer kan effektiveres og automatiseres, så vi kan bruge tiden smartere. Samtidig tilbyder kunstig intelligens helt nye teknologier og værktøjer, som kan give os muligheder for at gøre ting, vi ellers aldrig ville have været i stand til. Dem skal vi lære at bruge - og bruge rigtigt. For vi kan også, hvis vi gør det forkert, sætte hele vores troværdighed over styr.

Derfor er jeg både ydmyg over for opgaven og enormt stolt over at få en helt central rolle i, hvordan DR Nyheder skal arbejde med AI i fremtidens journalistik og nyhedsproduktion. Det bliver sjovt!

Senior ML Engineer - AI Enablement

Arbeidsgiver: Schibsted

Stillingstittel: Senior ML Engineer

Frist: snarest

Ansettelsesform: Fast

Bli kjent med Schibsted

About the AI Enablement Program

The AI Enablement program's mission is to improve Schibsted's maturity in successfully applying AI technologies throughout the company. This is done by offering training to boost competence, building a community of practitioners that can learn and inspire each other, guiding and helping brands explore the use of AI in their products, and collaborating with academia and top researchers in relevant fields to develop new technologies that can be used in Schibsted's products.

About the role

As a Senior ML Engineer Enabler, your primary responsibility will be to enable teams and organisations to set-up AI production capabilities. This includes designing and implementing AI training and deployment infrastructure for both experimentation and infrastructure that is capable of scaling to support larger projects and iterative training.

You will work in a team of data scientists and AI experts with high technical expertise. Working in close collaboration with your team, you will play a key role in developing cutting-edge prototypes that both inspire the organisation but also ensure that the prototypes that are built are robust, scalable, and efficient. The main skill we are looking for is not deep AI knowledge, but a strong engineering background with the ability to learn, evaluate and use useful machine learning libraries and tools.

You will have a high degree of freedom and autonomy in what and how to solve Schibsted's AI problems. If you see a need that you want to solve, do it!

Er du Aftenpostens nye robottrener?

Arbeidsgiver: Aftenposten AS

Stillingstittel: Er du Aftenpostens nye robottrener?

Frist: 10.12.2023

Ansettelsesform: Engasjement

Bli kjent med Schibsted

Aftenposten skal gjøre det like enkelt å lytte som å lese nyheter. Derfor har vi ved hjelp av kunstig intelligens utviklet en klonet stemme som leser nyheter fra Aftenposten.

En slik kunstig intelligent stemme kommer ikke ferdig utviklet, men må kontinuerlig trenes på ord den ikke har uttalt før. Journalistene i Aftenposten har et rikt ordforråd og intervjuer nye mennesker hver dag. Når den klonede stemmen skal uttale et nytt egennavn eller fremmedord for første gang, hender det at den uttaler det feil. Da må det menneskelig hjelp til for å korrigere uttalen.

Og det er her kanskje nettopp du kommer inn i bildet!

Vi har et team som jobber med å forbedre kvaliteten på uttale, men for en kortere periode trenger vi å styrke teamet. Jobben vil i stor grad gå ut på å bidra til å forbedre språkmodellen, gjennom å korrigere ord som i dag ikke uttales korrekt. Du vil jobbe ca 40 timer i måneden, og vi ser for oss at du kanskje er nyutdannet eller en lingvistikkstudent på slutten av studieløpet som har tid til en spennende og relevant deltidsjobb.

Du må regne med å kommunisere på både norsk og engelsk når du jobber hos oss.

ChatGPT can see, hear, and speak

Me

There's a weird sound coming from this part of my bike. What's wrong with it?

ChatGPT

That's unfortunate. Judging by the looks of your cassette, the sound could be caused by several things:

1. **Brake rubbing:** The pads may be worn down or misaligned and are rubbing against the wheel.
2. Loose or broken spokes: Check if any

Me

Make me an image of a seal juggling a bicycle, bowling pins, and bowling balls.

DALL·E

DALL·E

Here's a photorealistic image. It's a unique scene!

Me

Make it a cartoon for a children's book.

DALL·E

How much vanilla extract do I need for a dozen chocolate chip cookies?

For a dozen cookies, you'll typically need about one teaspoon of extract.

Chat with images

You can now show ChatGPT images and start a chat. Troubleshoot why your grill won't start, explore the contents of your fridge to plan a meal, or analyze a complex graph for work-related data.

Learn more

Create new images

Create images simply by describing them in ChatGPT. Invent new logos, comic strips, and photorealistic scenes right in the chat. You can bring your ideas to life with our most capable image model, DALL·E 3.

Learn more

Chat with voice

You can now use voice to engage in a back-and-forth conversation with ChatGPT. Speak with it on the go, request a bedtime story for your family, or settle a dinner table debate.

Kan jeg som NRK-ansatt eie aksjer?

Presseetikeren

Som NRK-ansatt, er det viktig å være oppmerksom på hvordan eierskap i aksjer kan påvirke oppfatningen av din integritet og objektivitet. I henhold til de etiske normene for pressen, slik de er fastsatt i Vær Varsom-plakaten, er det essensielt å unngå interessekonflikter og situasjoner som kan skape spekulasjoner om inhabilitet.

Fra Vær Varsom-plakaten, punkt 2.2, fremgår det at redaktøren og den enkelte redaksjonelle medarbeider skal verne om sin uavhengighet, integritet og troverdighet. Det er viktig å unngå dobbeltroller, verv, oppdrag eller bindinger som kan skape interessekonflikter eller føre til spekulasjoner om inhabilitet. Dette kan tolkes som at eierskap av aksjer, spesielt i selskaper som NRK dekker journalistisk eller som har stor samfunnsmessig betydning, kan være problematisk.

Hvis du vurderer å eie aksjer, er det anbefalt å vurdere om dette kan påvirke eller oppfattes å påvirke din evne til å utføre jobben din på en objektiv og uavhengig måte. I situasjoner hvor det kan oppstå en potensiell interessekonflikt, bør du rådføre deg med din redaktør eller overordnede for å sikre at du holder deg innenfor de etiske rammene.

ChatGPT can make mistakes. Consider checking important information.

STORE OG TUNGE SAKER: Så langt i år har politiet i Innlandet startet fem etterforskning på drap. Det fører til et stort trøkk på både etterforskere, krimteknikere og alle som blir involvert i sakene.
FOTO: LARS ERIK SKREFSRUD / NRK

Saken oppsummert

- Januar har vært en måned med mange drap i Norge, med 8 registrerte drap så langt, og 11 ofre.
- Politiet i Innlandet har satt i gang fem drapsetterforskninger, noe som har ført til høy belastning på de ansatte.
- Ressursene som er bundet opp mot drapssakene fører til harde prioriteringer, med potensiell nedprioritering og henleggelse av mindre alvorlige saker.
- Politimester Johan Brekke uttrykker bekymring for økonomien, understreker at vakt og beredskap fortsatt er høyt prioritert.

Oppsummeringen er laget av en KI-tjeneste fra OpenAi. Innholdet er kvalitetssikret av NRKs journalister før publisering.

Januar har vært en dyster måned.

Fredag ble 75 år gamle Aina Hynne fra Grue drapsoffer nummer elleve i Norge i 2024.

Med den tragiske hendelsen i Grue har politiet i Innlandet satt i gang fem drapsetterforskninger så langt i år.

Og det er hjemme. Texas er hjemme.

Først vil jeg fortelle dere om, og dette kan være litt utrolig,

at vårt samfunn var fantastisk.

Vi har noen som er her i dag.

Vi har venner.

Vi har venner.

Noen som er her i dag.

Med klassemenn, lærer,

med kjærer,

med kjærer, med nærmere.

Vi har en samfunn.

Og i så mange måter,

det er som om vi er amerikanere.

Whisper AI

I was born and raised in San Antonio.

I was with my three brothers.

And it's home.

Texas is home.

And first what I want to share with you all is, and this may be a bit surprising, our childhood was amazing.

to spend time with friends.

We have friends, some of whom are here today.

With classmates and teachers and teammates and coaches

and neighbors, we have community.

And in so many ways, it's not like the American dream.

In so many ways, we are some of the most typical Americans.

And at the same time, we knew that many Americans didn't see us as it.

That we were seen as foreign, as outsiders, as threats.

And one of the challenges we had to figure out was how do we deal with the racism that came our way

in a way that helped us move beyond the daily outrage and the frustration and the anger.

The first time somebody called me a terrorist, I was 11 years old.

It wasn't far from here.

It was at a soccer game.

The referee came up to me during the pregame and put a text and said,

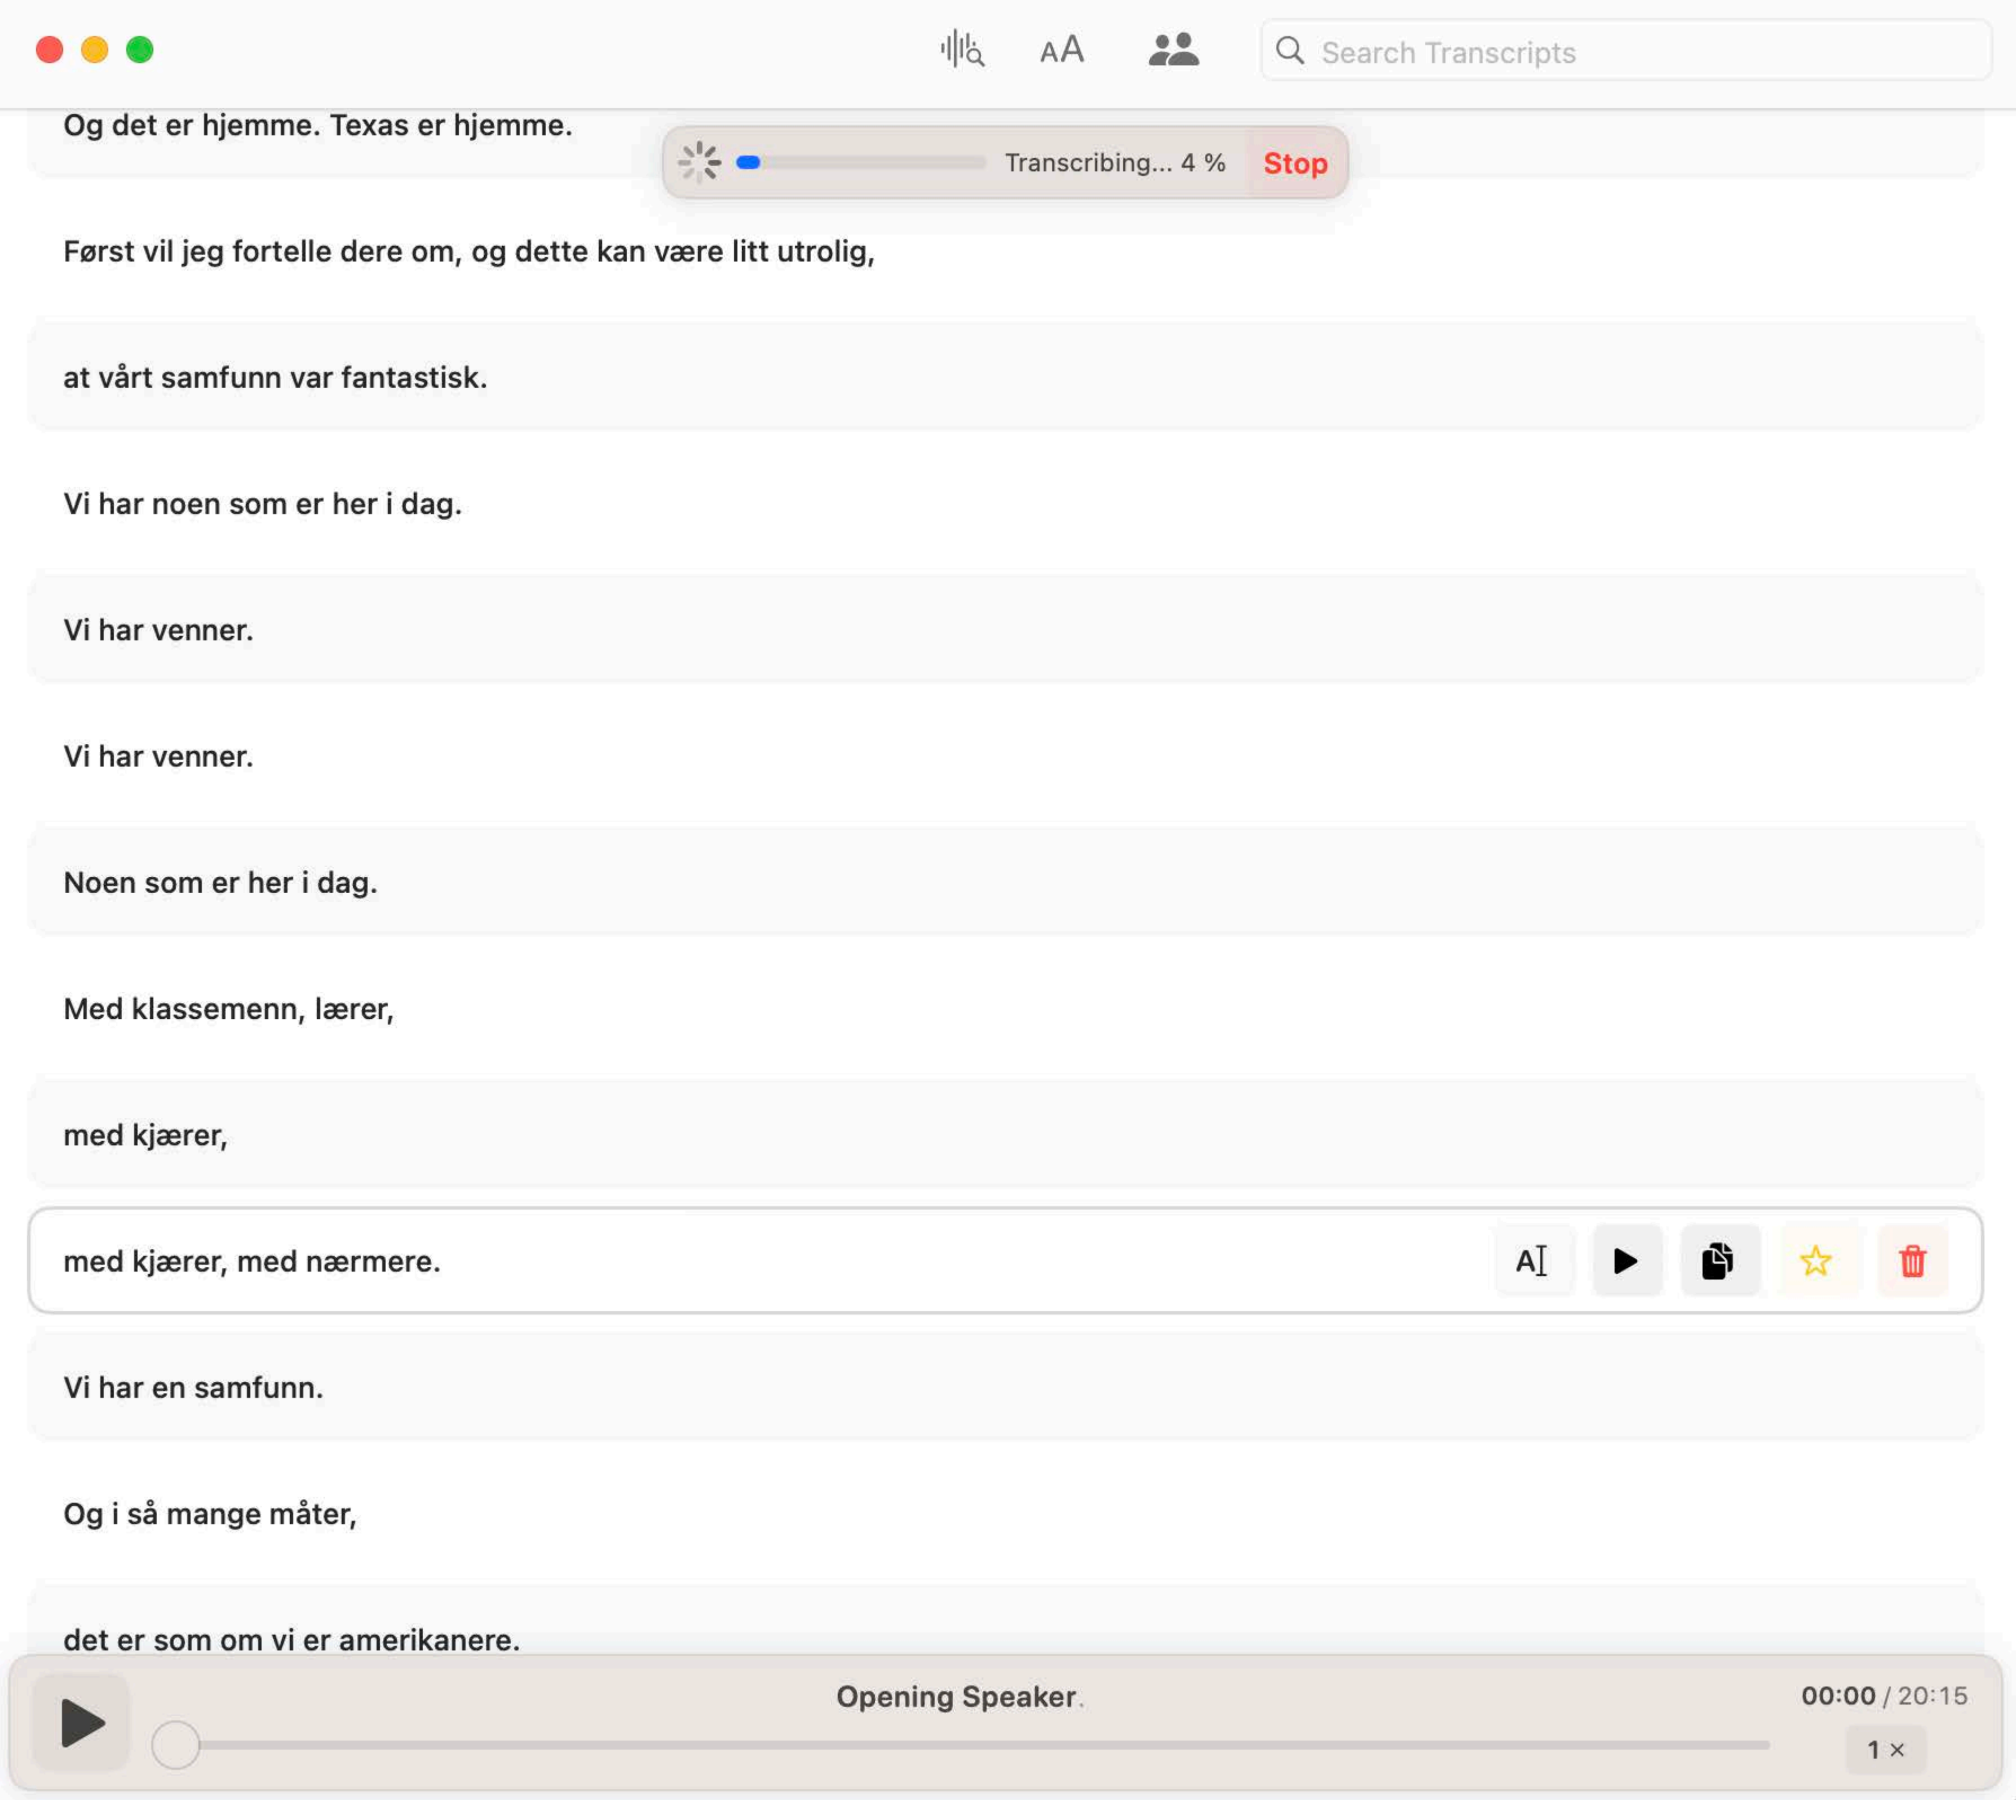
"I know your people like to hide bombs and knives for that kind of thing. I need you to check."

And I was a kid, he's an adult.

I wanted to play.

There were no other adults around.

I didn't know what to do.



Og det er hjemme. Texas er hjemme.

Først vil jeg fortelle dere om, og dette kan være litt utrolig,

at vårt samfunn var fantastisk.

Vi har noen som er her i dag.

Vi har venner.

Vi har venner.

Noen som er her i dag.

Med klassemenn, lærer,

med kjærer,

med kjærer, med nærmere.

Vi har en samfunn.

Og i så mange måter,

det er som om vi er amerikanere.

Whisper AI

picking it up and writing a show note to give them their papers back.

I mean, these actions are around us all the time.

We just don't notice.

And what you'll find, what I found,

is that what we describe as random acts of kindness

actually aren't everything.

They're all around us.

They're constant.

They live with us.

And learning to see the goodness,

learning to see the light,

learning to live with gratitude,

that's a choice that we can all make every day.

It begins with a practice,

and it takes us into a way of living

that can help us taste the sweetness of life,

even with all the challenges as we embrace them.

It can help us see the light, even with the darkness,

as we take it on.

In our tradition, we refer to this as the "Mekas,"

sweetness.

Sweetness is always around us. Grace and some other creatures. Blessings.

And my challenge for you all, as we move into the session today, into the conference,

make that choice. Find the goodness. Find the light. Thank you.

PORSCHE

Taleren deler sin opplevelse av å vokse opp som en amerikansk Sikh i San Antonio, Texas, og møte rasisme og diskriminering gjennom sin barndom og ungdom. Han snakker om hvordan hans mor og far håndterte slike situasjoner ved å finne en midtbane og skape optimisme i håpløse øyeblikk, og lære ham verdien av å se det gode i mennesker og verden rundt seg.

To spesifikke hendelser som formet talerens liv inkluderer: (1) morens håndtering av en diskriminerende situasjon på en rulleskøytebane, hvor hun inviterte samfunnet til å vise støtte, og (2) farens påminnelse om å fokusere
på naboer og venner som støttet familien etter 9/11-angrepene.

Taleren oppfordrer publikum til å finne lyset og godheten i verden ved å være oppmerksomme og takknemlige, og å se at såkalte "tilfeldige" handlinger av godhet faktisk er overalt og konstant.

1 Født og oppvokst i San Antonio med tre brødre.
2 Hadde en fantastisk barndom i Texas.
3 Opplevde rasisme som barn og ungdom.
4 Ble kalt terrorist første gang som 11-åring.
5 Møtte utfordringer med rasisme i idrett og skole.
6 Lærte å takle rasisme gjennom å engasjere seg og finne lys i mørket.
7 Moren inviterte lokalsamfunnet til å støtte dem i en utfordrende situasjon.
8 Lærte viktigheten av solidaritet og fellesskap.
9 Erfarte evig optimisme gjennom vanskelige tider.
11 september 2001 endret livet hans for alltid.
10 Opplevde dødstrusler og frykt etter terrorangrepet.
11 Lærte å se verden gjennom valg og perspektiv fra faren.
12 Innså at det er like mye skjønnhet som ondskap i verden.
13 Utviklet en vane med å legge merke til og observere mennesker.
14 Oppdaget at folk er gode og at små handlinger av godhet finnes overalt.
15 Lærte å leve med takknemlighet og se lyset i livet.
16 Praktiserer "Mekas", sødme, i hverdagen.
17 Utfordret publikum til å finne godhet og lys i livet.
18 Delte personlige historier og visdom fra sikhfilosofi.
19 Snakket om viktigheten av å finne menneskelighet i andre, selv når de ikke ser vår egen.

3h •

We're testing something new at Spotify! Starting today - a pilot group of podcasters can now automatically translate their podcast episodes into alternate languages - all while keeping it in their own voice. It's called Voice Translation and uses AI to translate pods into Spanish, French and German. It's pretty insane to hear. More languages and more podcasts to come soon! Let me know what you think.

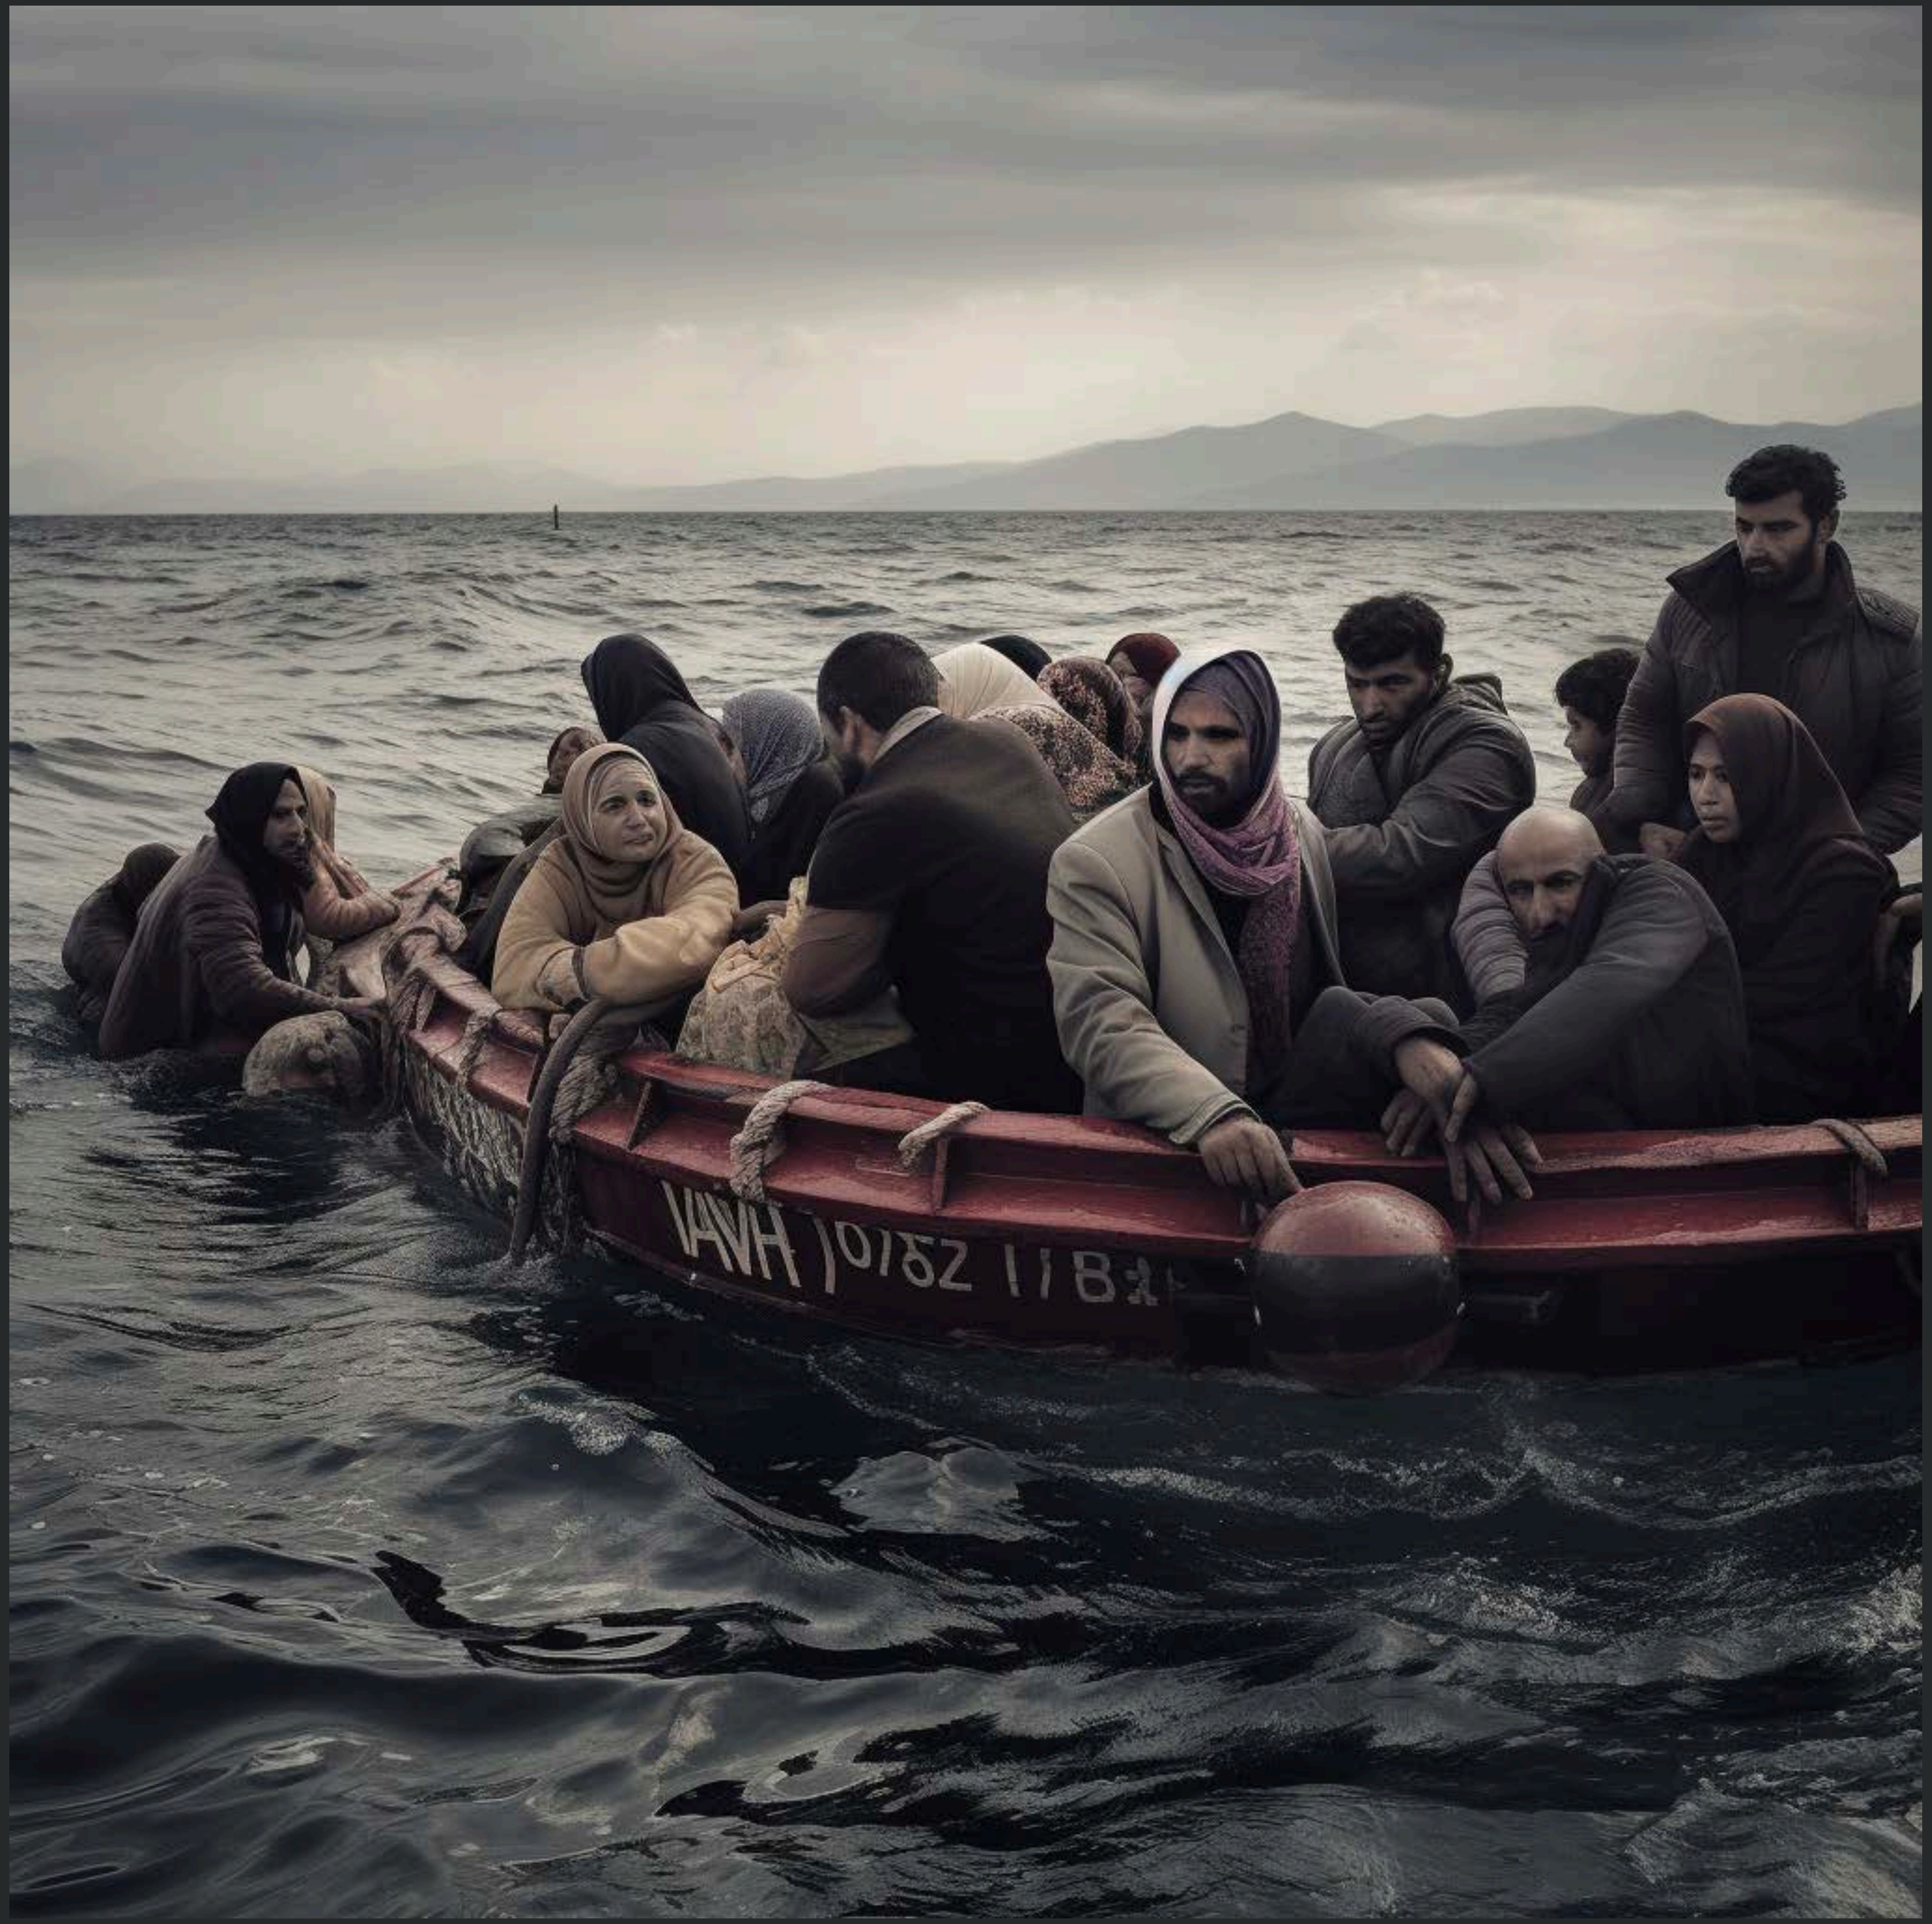
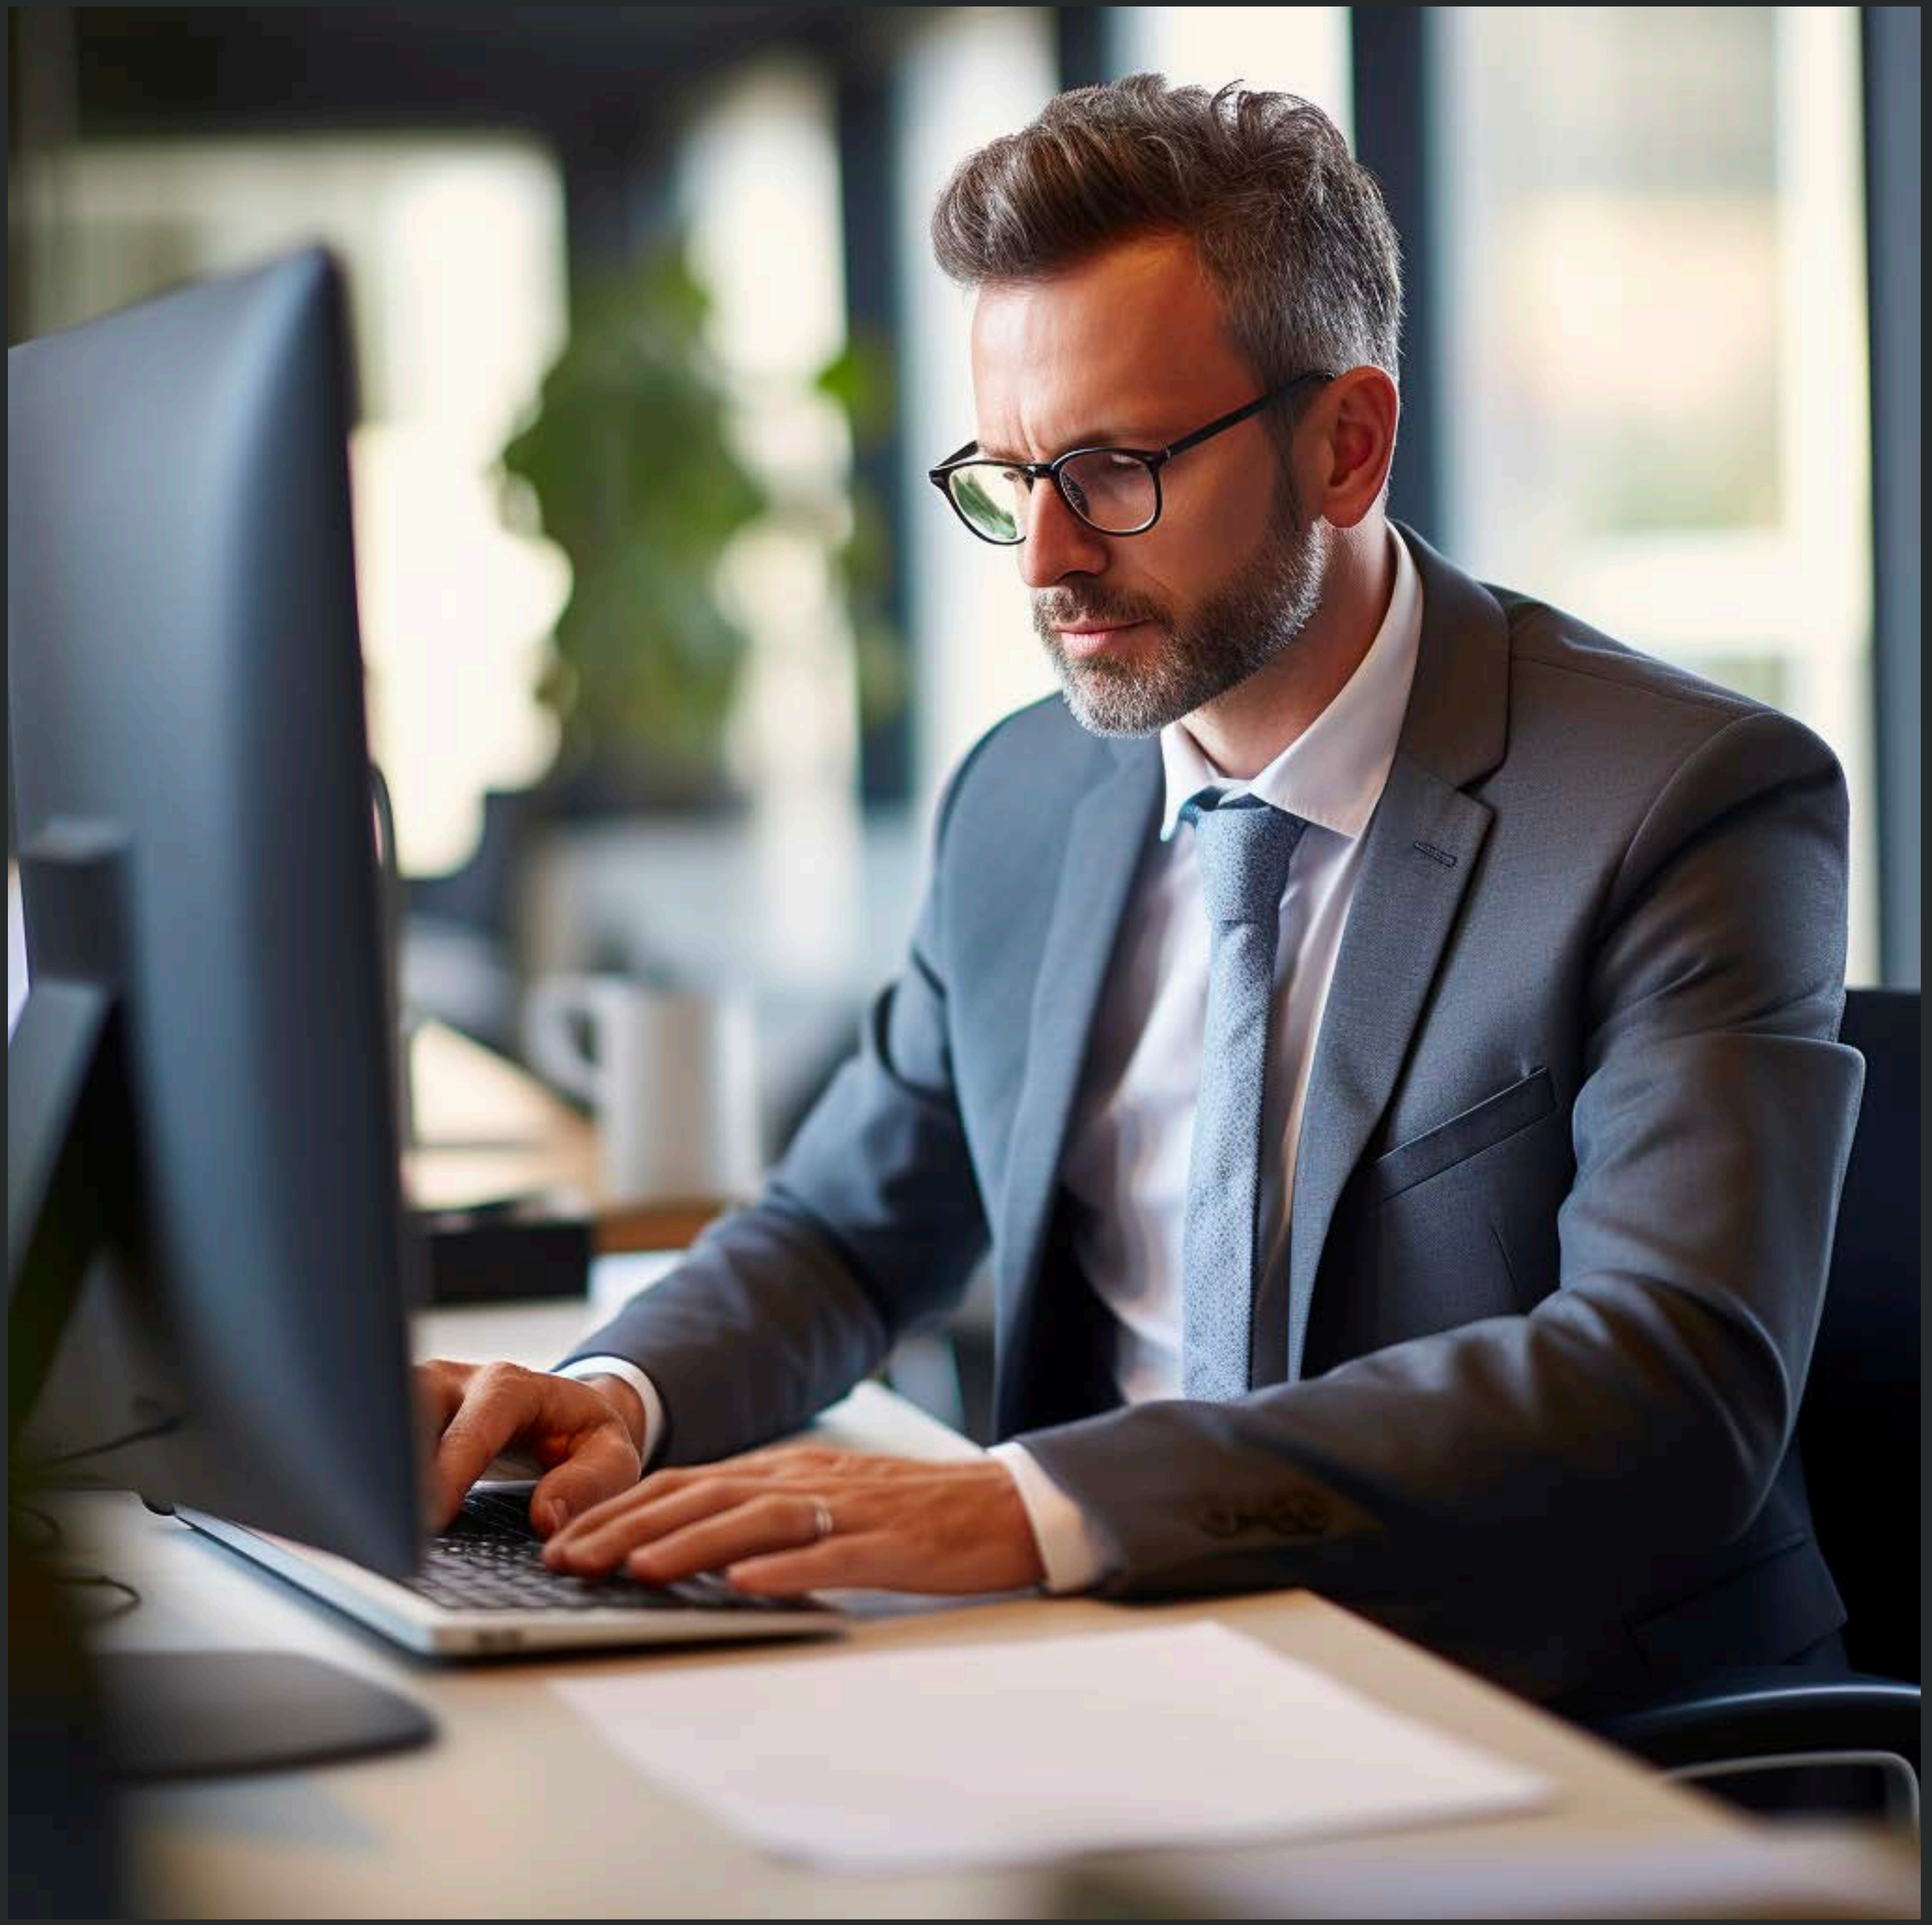
Ikke ekte fotojournalistikk



a documentary-style, photorealistic image capturing a group of refugees aboard a boat, as they approach the shoreline in search of safety and a new beginning. The photograph should convey the emotions and the struggles experienced by these individuals while emphasizing their resilience and hope for a better future. Use a high-quality camera, such as the Canon EOS 5D Mark IV, equipped with a 400mm lens to provide a versatile focal range for capturing both the boat and its passengers in detail. Position yourself at a vantage point on the shoreline that offers a clear view of the boat's approach, while still maintaining a respectful distance. Set your camera's aperture to f/2.8 or higher to ensure a deep depth of field, capturing the details of the boat, the passengers, and the surrounding environment. Utilize natural lighting to create a sense of realism and to emphasize the contrast between the refugees' uncertain journey and the stability of the land they are approaching. Frame the shot to include the boat and its passengers, as well as the shoreline, which represents their destination and hope for a better life. Capture the expressions and body language of the refugees, illustrating their determination, fear, and anticipation. During post-processing, adjust the color balance, contrast, and sharpness to accentuate the raw emotions and the real-life experience of the refugees. Preserve the authenticity of the scene by avoiding over-editing, and allow the photograph to tell the powerful story of hope and resilience.

Ekte Stock-shots?



a stock photo of a professional-looking man wearing a tie and glasses, sitting at a desk in front of a computer screen while typing on a keyboard. The image should convey a sense of focus and productivity, making it suitable for use in various business or office-related contexts. Use a high-quality camera, such as a Canon EOS 5D Mark IV, with a 50mm lens to capture a crisp and clear image. Set the aperture to f/4 to ensure the subject is in focus, while gently blurring the background to avoid distractions. Choose a well-lit office or workspace setting, utilizing natural light to create an inviting atmosphere. Position the man at a clean and organized desk, facing the computer screen with a straight posture, and ensure his facial expression conveys concentration and professionalism. Frame the shot to include the man's upper body, the computer screen, and the keyboard, while keeping the background uncluttered and simple. Capture the scene from an angle that emphasizes the subject's engagement with his work while also showcasing his attire, glasses, and the office environment. In post-processing, adjust the color balance, contrast, and sharpness to achieve a polished and professional look. Keep the image's colors natural and consistent, ensuring the overall tone remains suitable for a wide range of business and office-related uses.

PICS AND IT DIDN'T HAPPEN —

OpenAI collapses media reality with Sora, a photorealistic AI video generator

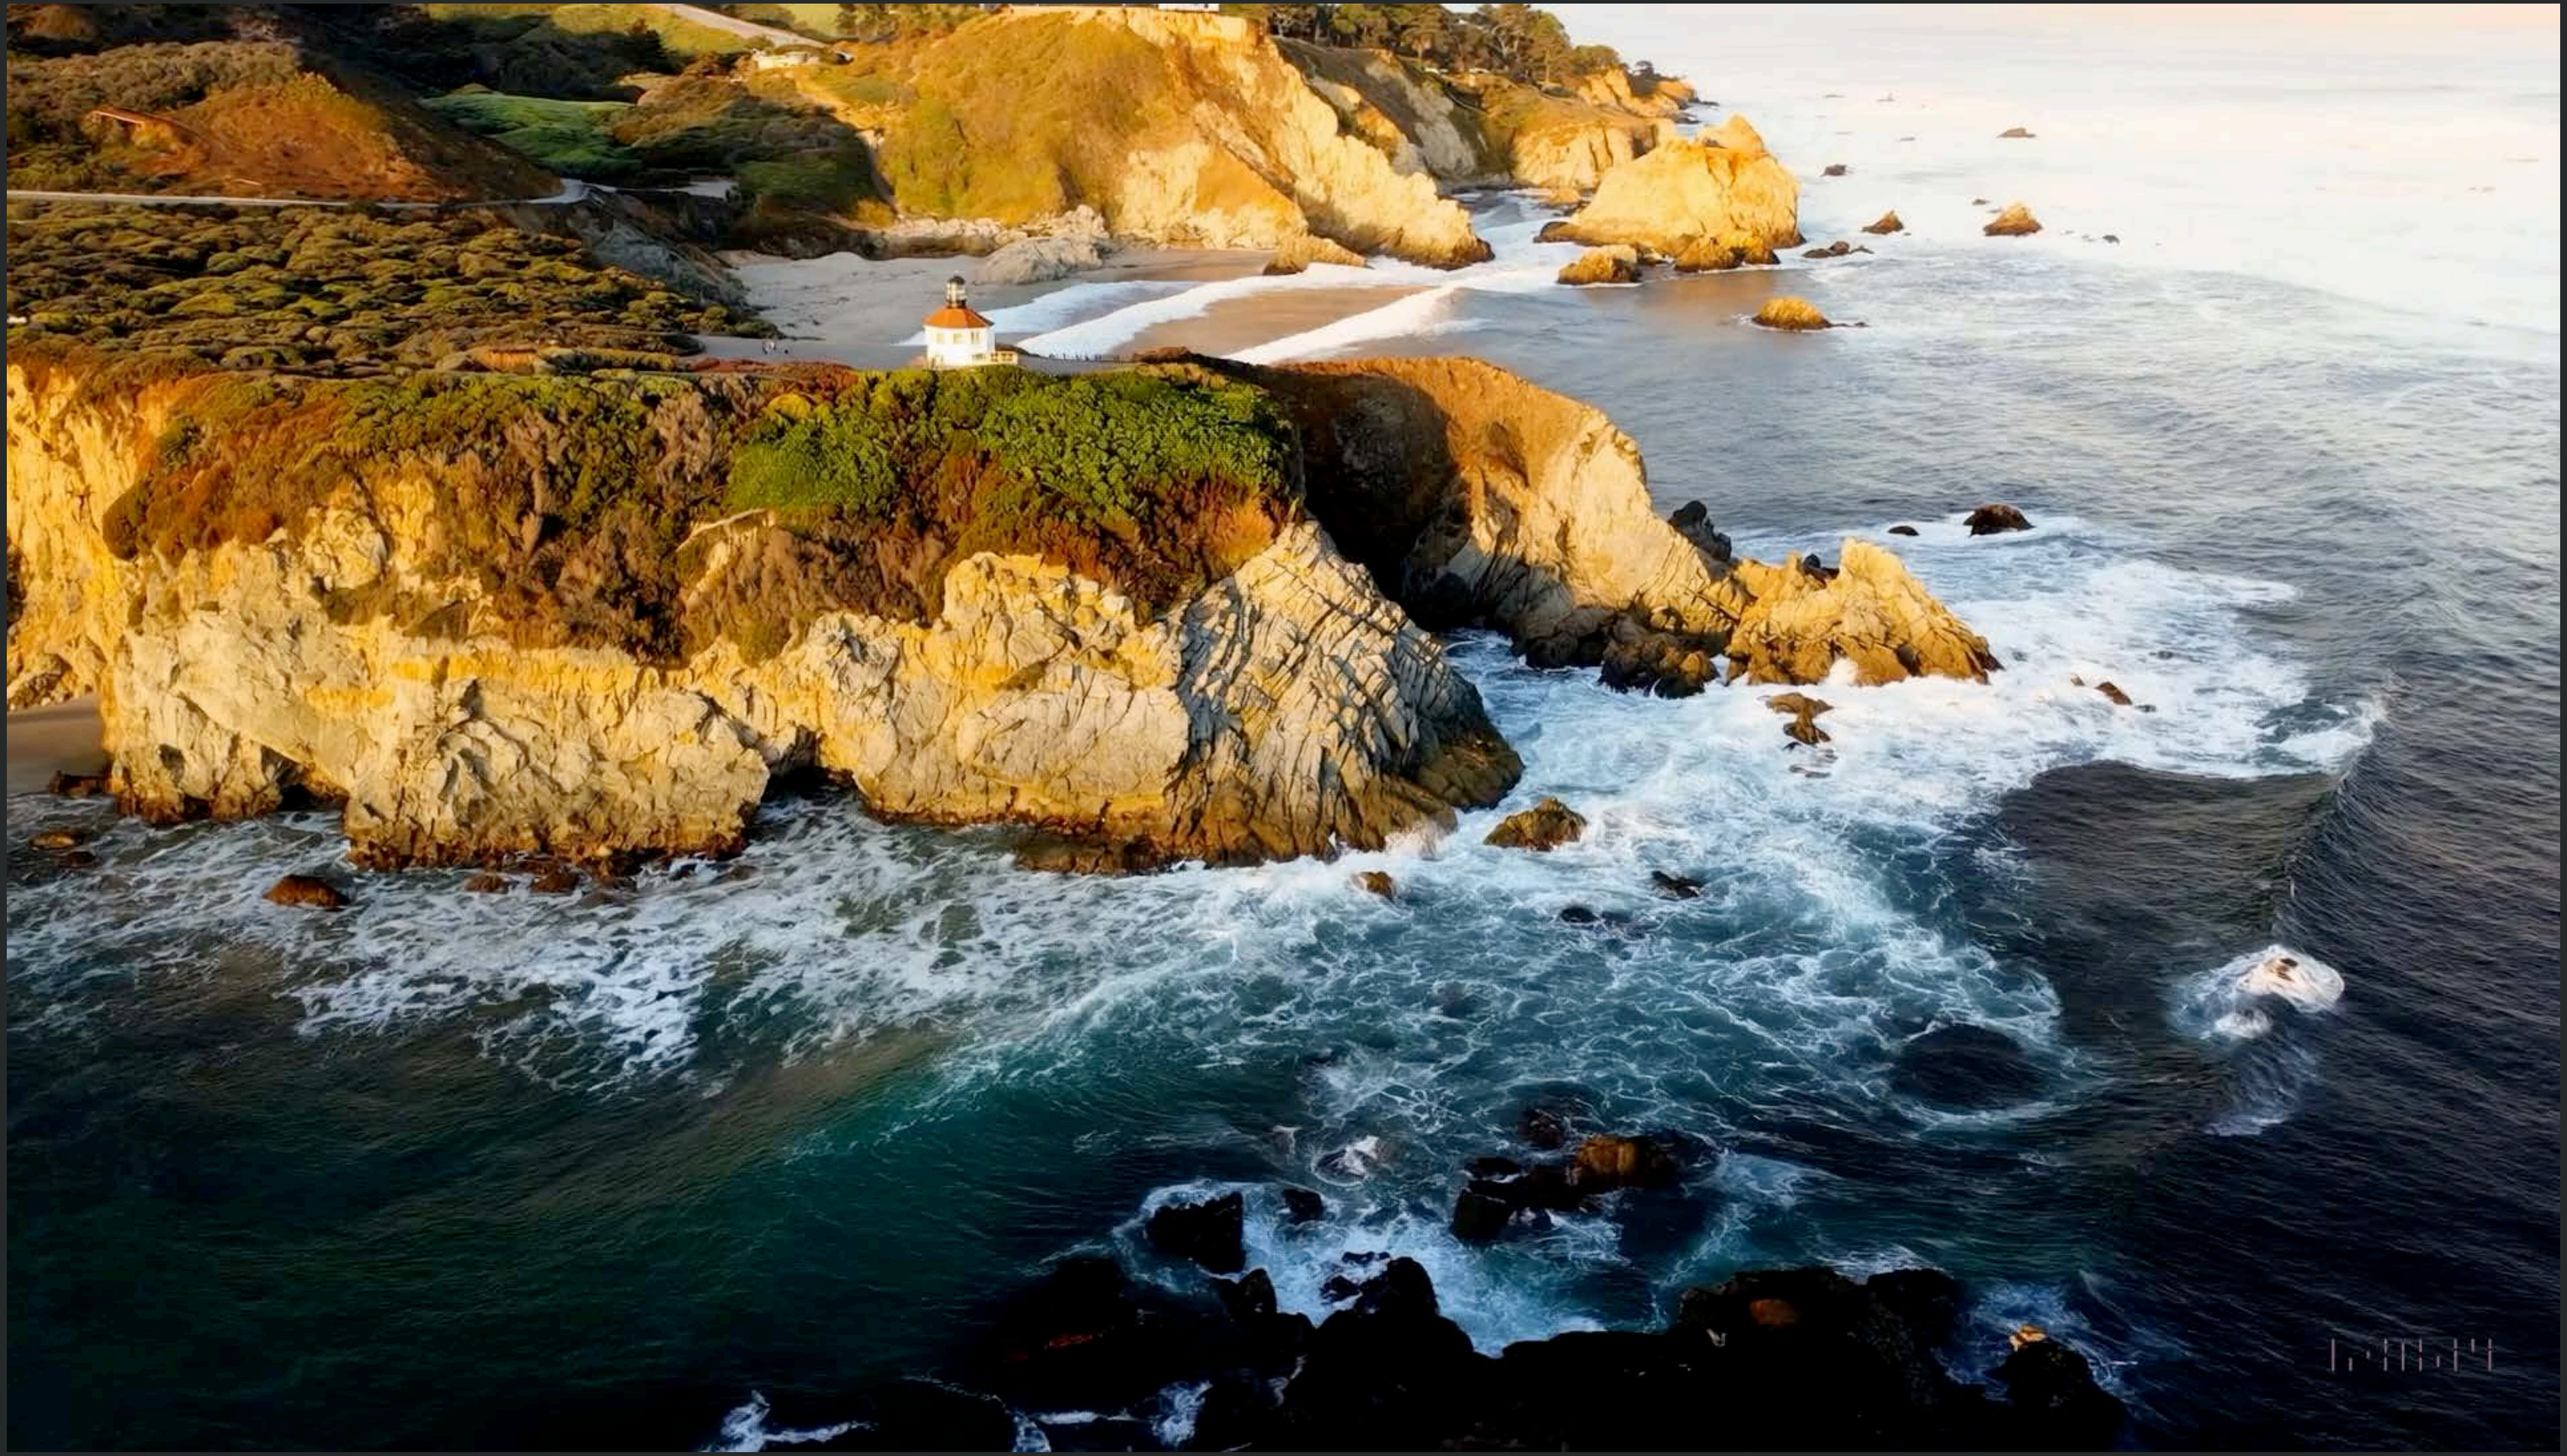
Hello, cultural singularity—soon, every video you see online could be completely fake.

BENJ EDWARDS - 2/16/2024, 6:23 PM

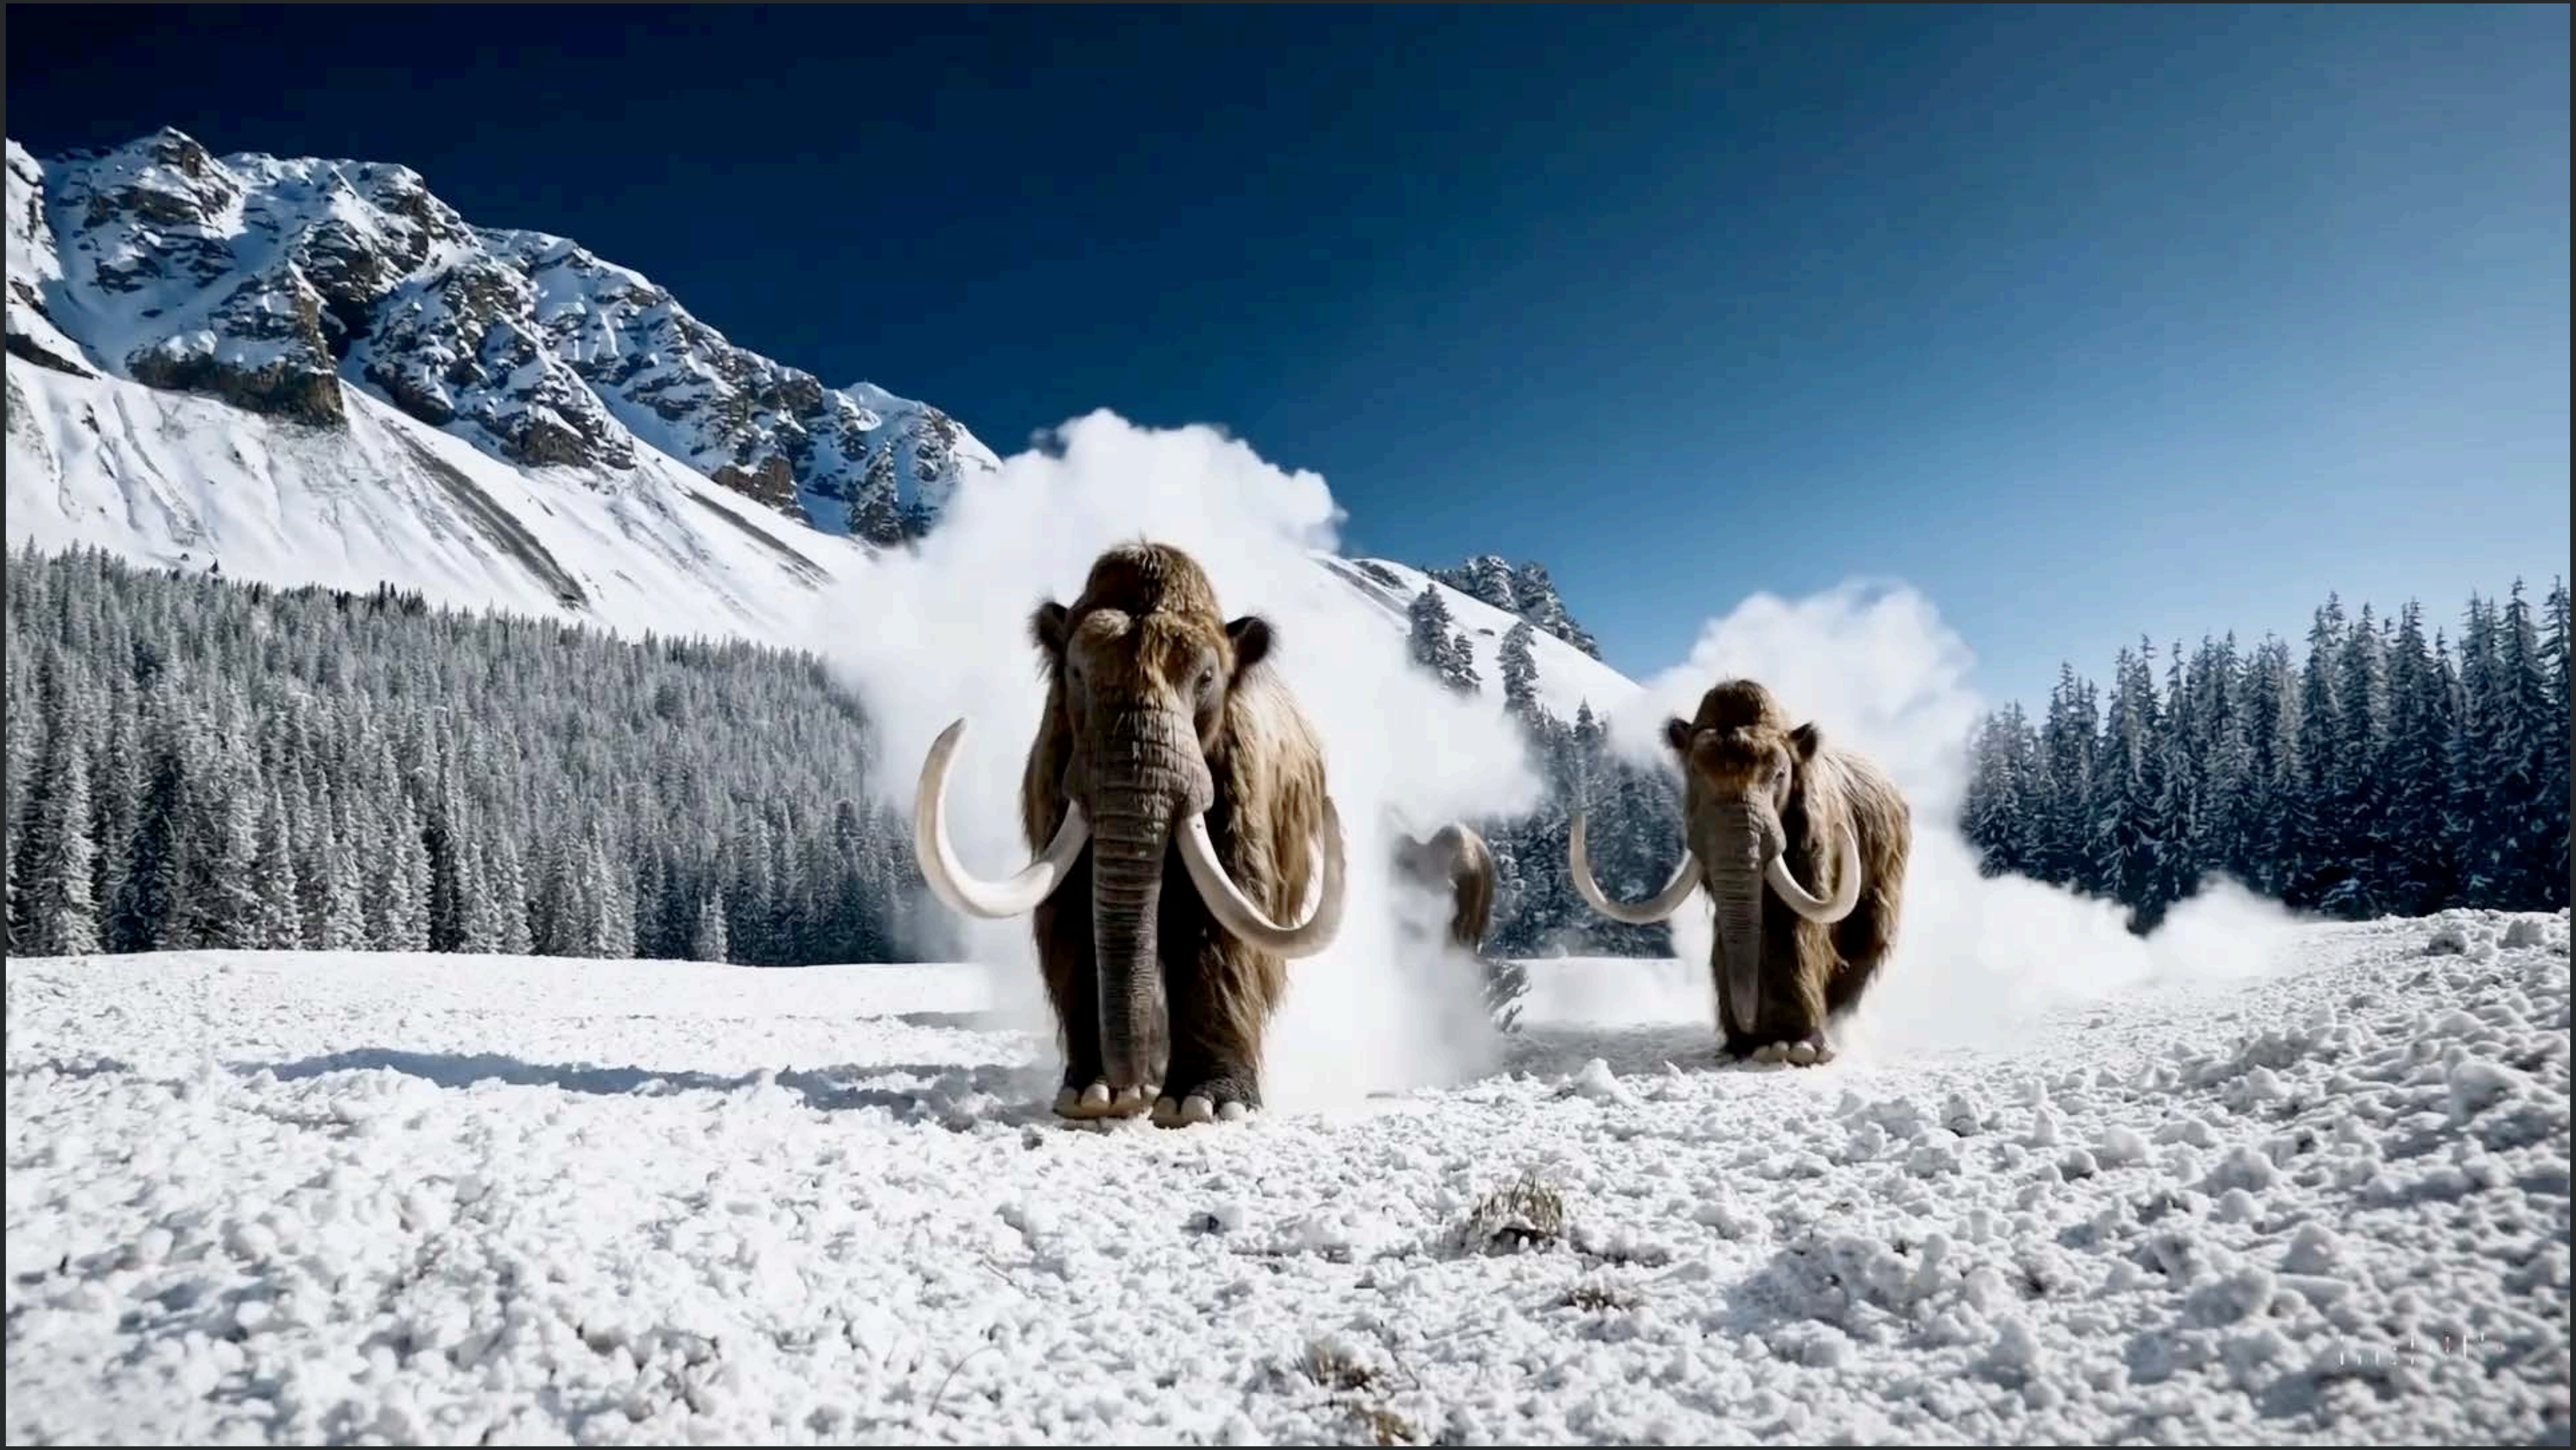
Enlarge / Snapshots from three videos generated using OpenAI's Sora.

376

On Thursday, OpenAI announced Sora, a text-to-video AI model that can generate 60-second-long photorealistic HD video from written descriptions. While it's only a research preview that we have not tested, it reportedly creates synthetic video (but not audio yet) at a fidelity and consistency greater than any text-to-



Prompt: Drone view of waves crashing against the rugged cliffs along Big Sur’s garay point beach. The crashing blue waters create white-tipped waves, while the golden light of the setting sun illuminates the rocky shore. A small island with a lighthouse sits in the distance, and green shrubbery covers the cliff’s edge. The steep drop from the road down to the beach is a dramatic feat, with the cliff’s edges jutting out over the sea. This is a view that captures the raw beauty of the coast and the rugged landscape of the Pacific Coast Highway.



Prompt: Several giant wooly mammoths approach treading through a snowy meadow, their long wooly fur lightly blows in the wind as they walk, snow covered trees and dramatic snow capped mountains in the distance, mid afternoon light with wispy clouds and a sun high in the distance creates a warm glow, the low camera view is stunning capturing the large furry mammal with beautiful photography, depth of field.

Now you can block OpenAI's web crawler

/ Internet users can block GPTBot and keep their site out of ChatGPT.

By Emilia David, a reporter who covers AI. Prior to joining The Verge, she covered the intersection between technology, finance, and the economy.

Aug 7, 2023, 7:36 PM GMT+2 | 18 Comments / 18 New

Image: OpenAI

OpenAI now lets you block its web crawler from scraping your site to help train GPT models.

OpenAI said website operators can specifically disallow its GPTBot crawler on their site's Robots.txt file or block its IP address. "Web pages crawled with the GPTBot user agent may potentially be used to improve future models and are filtered to remove sources that require paywall access, are known to gather personally identifiable information (PII), or have text that violates our policies," OpenAI said in the blog post. For sources that don't fit the excluded criteria, "allowing GPTBot to access your site can help AI models become more accurate and improve their

TECHNOLOGY | CHINA

Chinese tech giant Alibaba to release ChatGPT rival

04/11/2023

Chinese firm Alibaba has introduced Tongyi Qianwen, an AI-powered language model similar to GPT. At the same time, Beijing revealed a draft law that new AI must "reflect socialist values."

The new AI model Tongyi Qianwen — which means "truth from a thousand questions" — can draft invitation letters, summarize meeting notes and advise users on what type of makeup to purchase, as showed in a filmed demonstration on Tuesday.

"We are at a technological watershed moment driven by **generative AI** and cloud computing, and businesses across all sectors have started to embrace intelligence transformation to stay ahead of the game," said **Alibaba Group** CEO Daniel Zhang.

The model will be integrated into DingTalk, Alibaba's workplace messaging app and Tmall Genie, its voice assistant. Tongyi Qianwen can draft business proposals and emails and "will bring about big changes to the way we produce, the way we work, and the way we live our lives," according to Zhang.

Last Friday, Alibaba published a teaser to the new chatbot, with a post on social media reading: "Hello, my name is Tongyi Qianwen, this is our first time meeting, I welcome your feedback."

Alibaba Cloud plans to open Tongyi Qianwen to customization from users, so that they can build their own large language models.

More than 70% of Chinese, Saudi, and Indians Feel Positively About Artificial Intelligence. Americans? 35%

By Amy D

Posted on April 5, 2023

The Stanford report on the state of AI, a 386-page document about how artificial intelligence is changing the world, reveals some interesting numbers about how different countries perceive technological advancements.

According to Stanford's AI report, more than 70% of Chinese, Saudi, and Indian respondents felt that AI had more benefits than drawbacks. Meanwhile, just 35% of Americans felt as positively about AI.

From the report highlights:

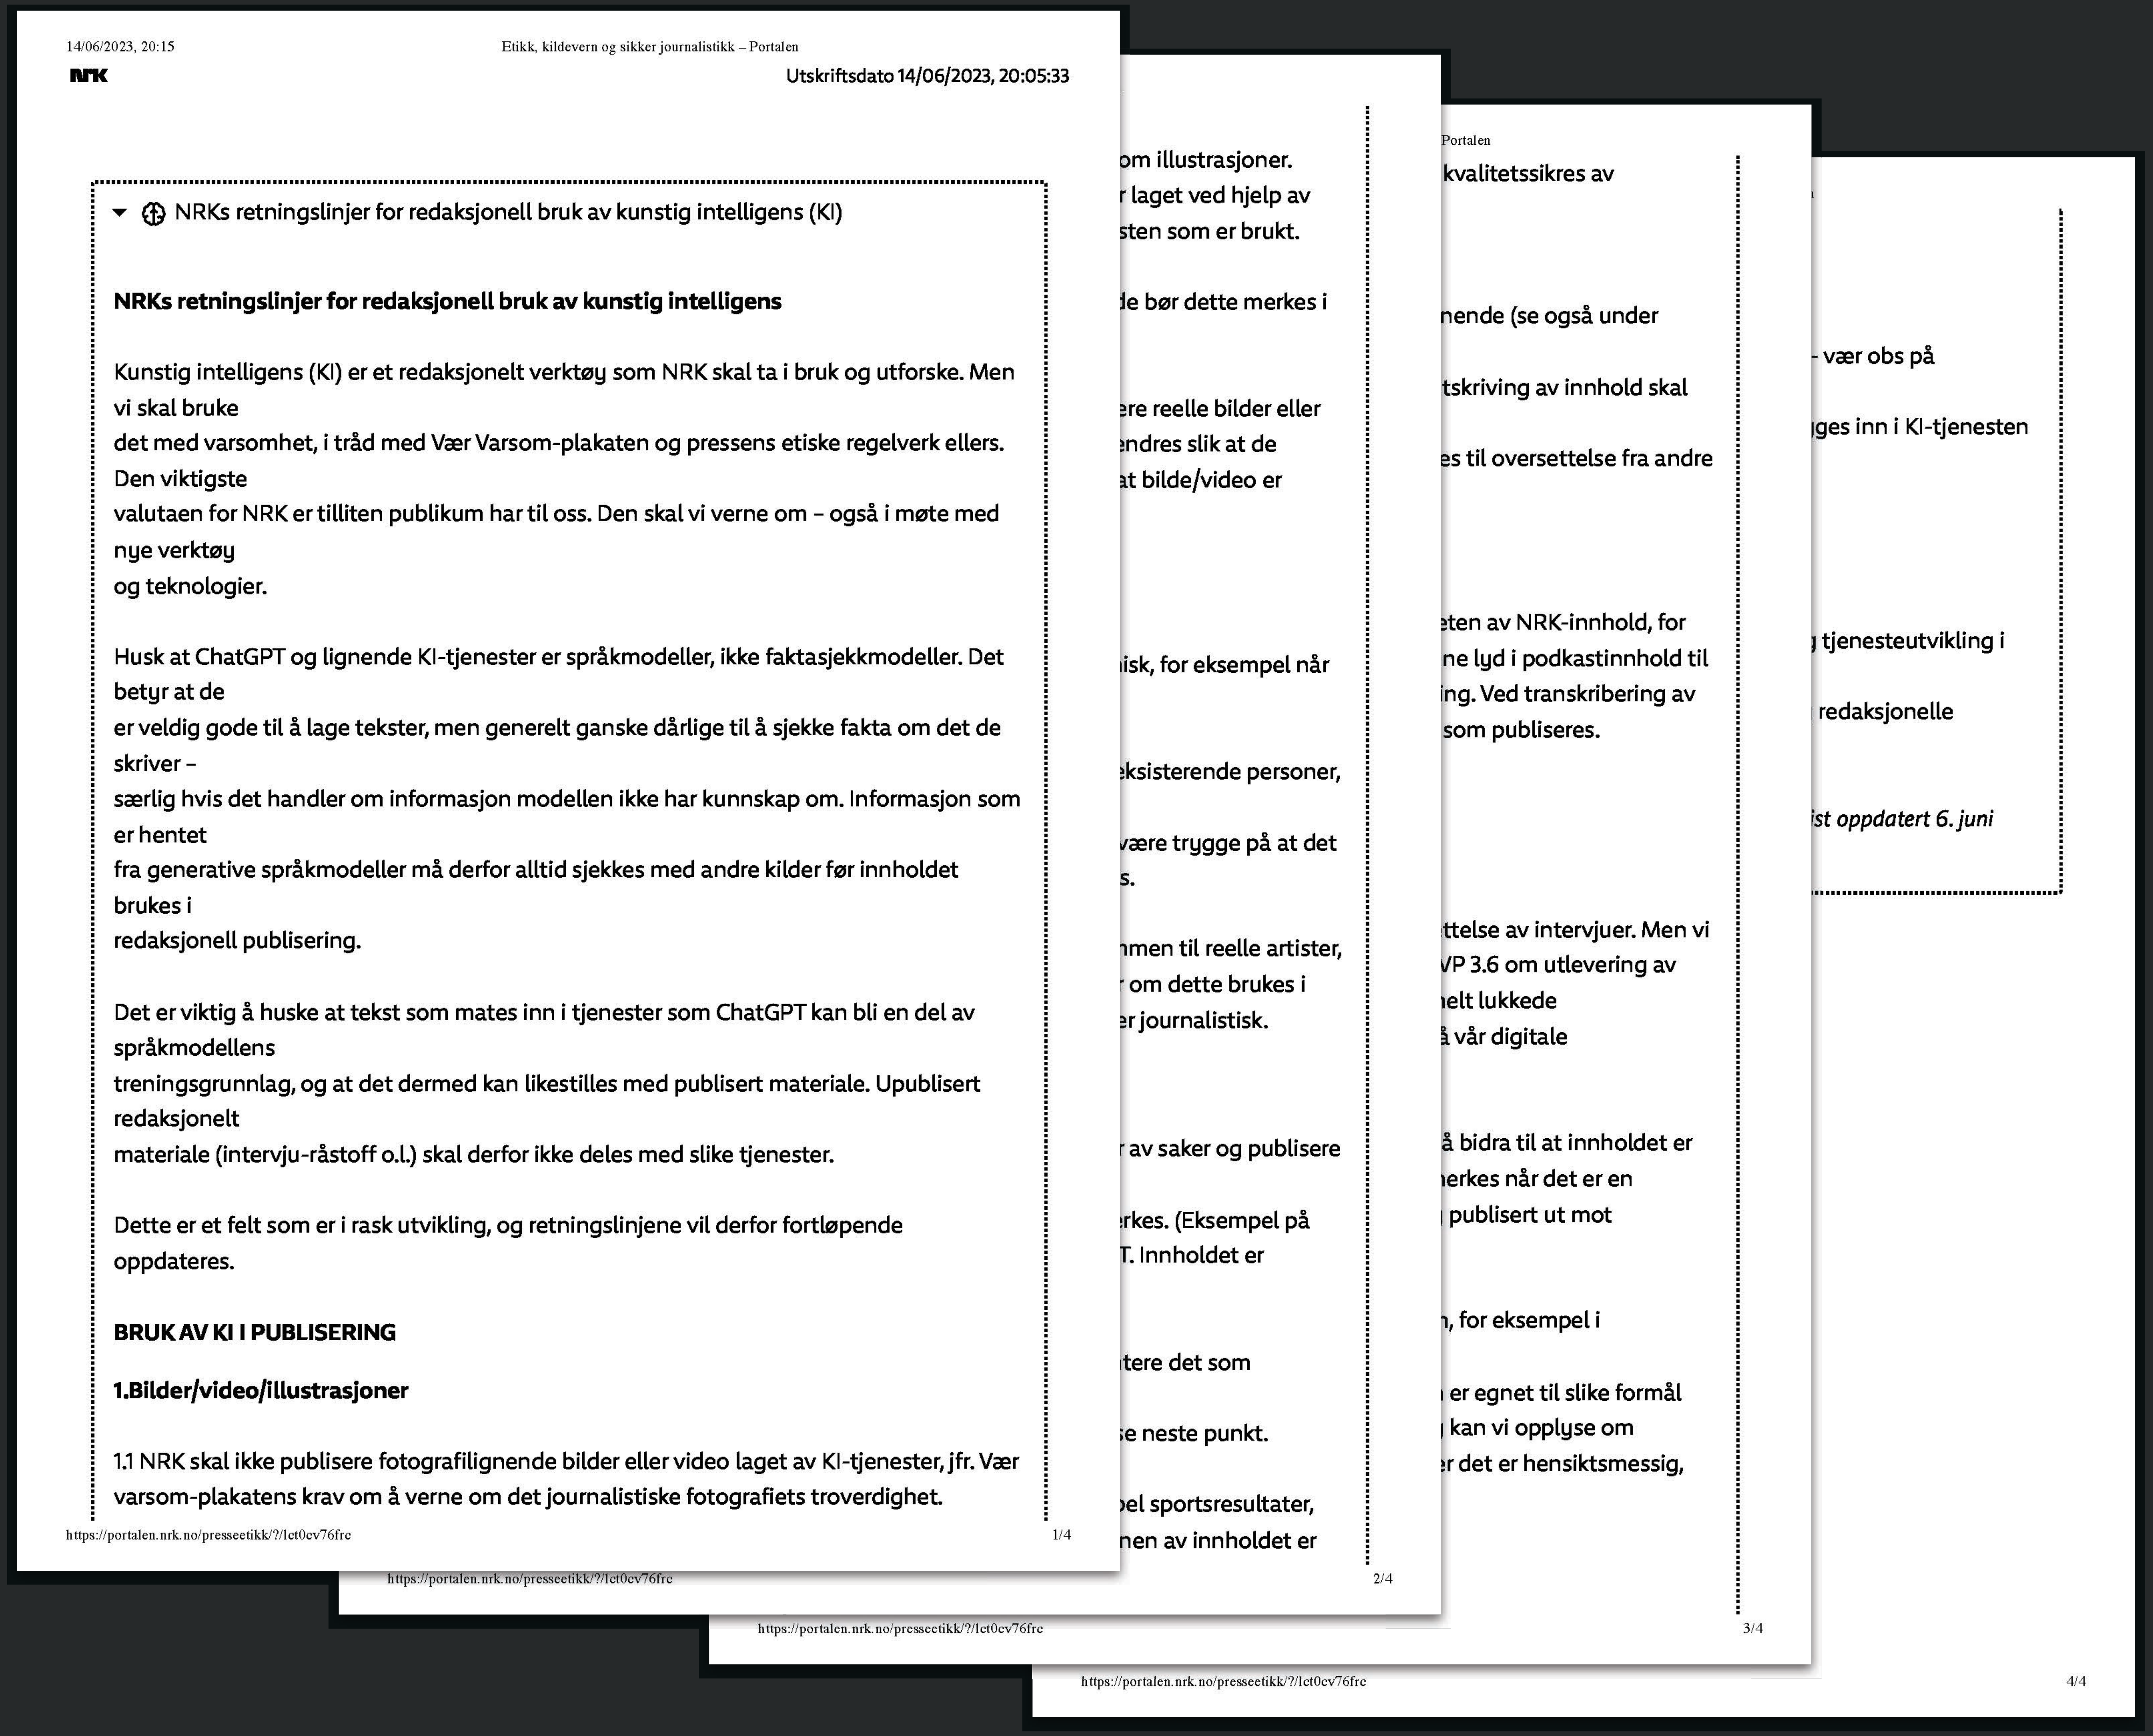
Etiske retningslinjer for redaksjonell bruk



Utskriftsdato 14/06/2023, 20:05:33

NRKs retningslinjer for redaksjonell bruk av kunstig intelligens (KI)

NRKs retningslinjer for redaksjonell bruk av kunstig intelligens

Kunstig intelligens (KI) er et redaksjonelt verktøy som NRK skal ta i bruk og utforske. Men vi skal bruke
det med varsomhet, i tråd med Vær Varsom-plakaten og pressens etiske regelverk ellers. Den viktigste
valutaen for NRK er tilliten publikum har til oss. Den skal vi verne om – også i møte med nye verktøy
og teknologier.

Husk at ChatGPT og lignende KI-tjenester er språkmodeller, ikke faktasjekkmodeller. Det betyr at de
er veldig gode til å lage tekster, men generelt ganske dårlige til å sjekke fakta om det de skriver –
særlig hvis det handler om informasjon modellen ikke har kunnskap om. Informasjon som er hentet
fra generative språkmodeller må derfor alltid sjekkes med andre kilder før innholdet brukes i
redaksjonell publisering.

Det er viktig å huske at tekst som mates inn i tjenester som ChatGPT kan bli en del av språkmodellens
treningsgrunnlag, og at det dermed kan likestilles med publisert materiale. Upublisert redaksjonelt
materiale (intervju-råstoff o.l.) skal derfor ikke deles med slike tjenester.

Dette er et felt som er i rask utvikling, og retningslinjene vil derfor fortløpende oppdateres.

BRUK AV KI I PUBLISERING

1.Bilder/video/illustrasjoner

1.1 NRK skal ikke publisere fotografilignende bilder eller video laget av KI-tjenester, jfr. Vær varsom-plakatens krav om å verne om det journalistiske fotografiets troverdighet.
